

SHIKHA SHUKLA

Greater Noida, Uttar Pradesh | 8799704209 | [linkedin.com/in/shikha-shukla-779133339/](https://www.linkedin.com/in/shikha-shukla-779133339/) | [eetcode.com/u/Shikha_Shukla19/](https://github.com/Shikha_Shukla19/)

EDUCATION

Galgotias University — B.Tech, Computer Science & Engineering

Sep 2023 – Jun 2027

CGPA: 8.70 / 10

TECHNICAL SKILLS

Languages: Python, Java, SQL,

CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, APIs.

AI / ML: Machine Learning, Deep Learning, LLM, OpenCV

Engineering Tools: Git, GitHub, SDLC.

PROJECTS

AI Meeting Memory Assistant

Present

Node.js, Express.js, MongoDB, Google Gemini API, JWT Authentication, Nodemailer, REST APIs

- Architected a role-based web application for automated meeting intelligence; designed and implemented RESTful API endpoints for transcript ingestion, AI summarization, and action-item tracking.
- Designed modular MongoDB schemas with indexing strategies to optimize read performance for multi-user concurrent access and efficient document retrieval.
- Integrated Google Gemini API for natural language summarization and structured task extraction from unstructured meeting transcripts.
- Implemented JWT-based authentication with role-based authorization middleware and engineered automated email notification workflows via Nodemailer.

Driver Drowsiness Detection System

Aug 2024 – Nov 2024

Python, OpenCV, Machine Learning, Computer Vision, Real-Time Processing

- Engineered a real-time computer vision pipeline for driver fatigue detection using facial landmark analysis and frame-level feature extraction with OpenCV on live video streams.
- Trained and evaluated ML classification models distinguishing alert vs. drowsy facial states; achieved ~98% detection accuracy across varied lighting conditions.
- Designed a low-latency alert subsystem with audio-visual warnings; applied modular architecture, iterative debugging, and systematic performance testing throughout development.

EXPERIENCE

Python Full Stack Development Intern — EduSkills

Jul 2025 – Aug 2025

- Built backend modules covering REST API design, database integration, and authentication workflows; reinforced SDLC principles and software design patterns using Python.
- Applied Git-based version control, debugging practices, and collaborative development workflows across structured full-stack engineering exercises.

ACHIEVEMENTS

- Solved 400+ LeetCode problems across Dynamic Programming, Graph Algorithms, Trees, Binary Search, and Sliding Window techniques; earned multiple monthly challenge badges.
- HackerRank: Python (4 Stars), SQL (4 Stars), Problem Solving (3 Stars) — demonstrating strong algorithmic problem solving and SQL query optimization skills.

CERTIFICATIONS

- CS50: Introduction to Programming with Python — Harvard University (HarvardX / edX)
- Database Management System — Oracle
- Career Edge Young Professional — TCS iON
